

VESPA: a Virtual Observatory in Planetary Science (progress report)

Stéphane Erard
Baptiste Cecconi
Pierre Le Sidaner

PADC / Observatoire de Paris

with Europlanet-2020/VESPA partners
& data providers

Journées ASOV

Paris, 15/3/2017

stephane.erard@obspm.fr

New in 2016-17:

Data Access Protocol updated

EPN-TAP v.2

More flexible, less ambiguous, easier for service implementation

Enlarged content thanks to Europlanet-2020

Currently 32 data services open, more in test

ESA's Planetary Science Archive implemented, in test > 8 million files!

Call for new services just closed

(4 new services selected, to be implemented during workshop in April)

Input to IVOA working groups

New Solar System Interest Group to start next spring (chair: B. Cecconi)

Will provide input in other WG (UCDs, STC, applications, etc)

VESPA relies on international standards

- **IPDA - International Planetary Data Alliance**

Consortium of national space agencies, focuses on access to space mission archives

- **IVOA - International Virtual Observatory Alliance**

Consortium of national VO actions - provides interoperability standards

- **IAU - International Astronomical Union**

Provides standards for nomenclature, physical quantities, coordinate systems, fits data format, etc.

- **SPASE - Space Physics Archive Search Extract**

Provides interoperability standards for planetary plasmas

- **OGC - Open Geospatial Consortium**

Provides industry standards for GIS

VESPA data services

- A table describing each of the service files (using std parameters)
- Stored in postgresql + TAP-handling application at the institutes
- Searches through an optimized interface, connected to VO tools

Results in service titan

Plotting tools

Example queries

VESPA data access

- Global search interface for Planetary Science services
- Supports EPN-TAP + PDAP

<http://vespa.obspm.fr>

The screenshot displays the VESPA web interface. At the top, there is a navigation bar with 'All VO', 'Custom resource', 'Direct Query', 'Advanced Query', and 'Help'. Below this, a search bar shows 'apis' with 15506 results and 'bdip' with 704 results. The main content area is titled 'Results in service apis' and shows a table of search results. A blue arrow points from the table to a box containing the text 'To plot / analysis tools'. On the right side, there are sections for 'Plotting tools' (TOPCAT, Aladin, SPLAT, CASSIS) and 'Example queries' (Saturn in March 2012).

- SPLAT
- CASSIS

Example queries

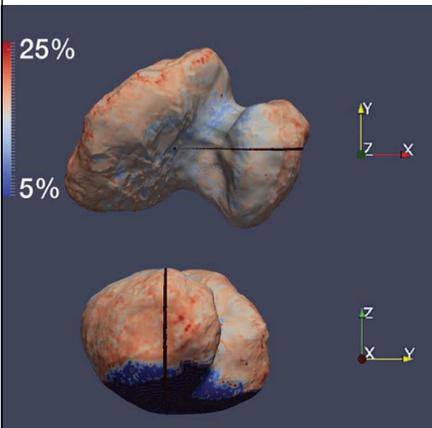

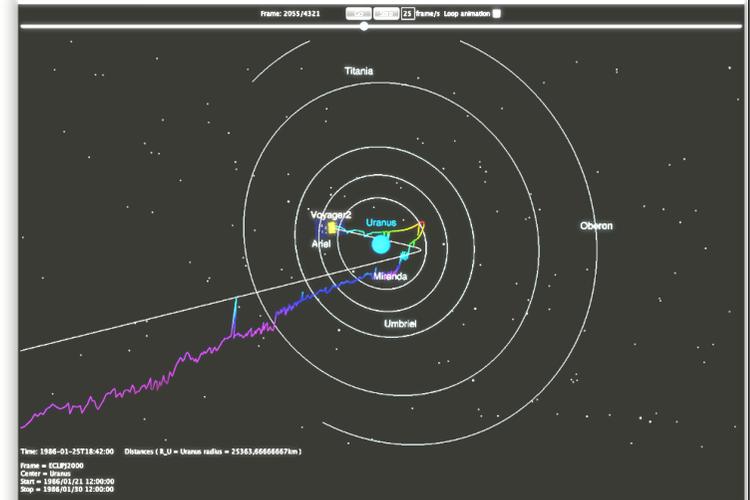

Saturn in March 2012

IVAO tools updated for VESPA

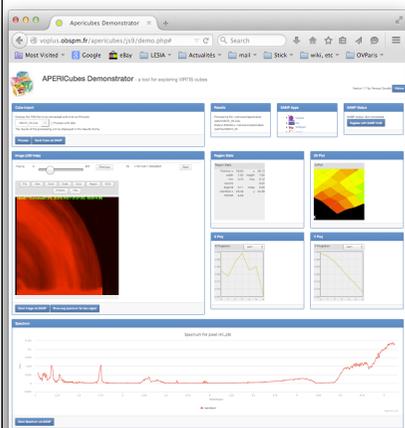

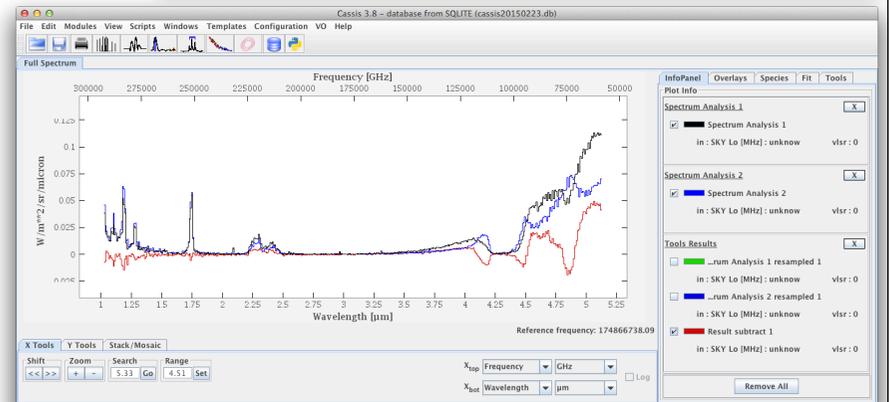

Aladin (CNRS): add coordinate systems

3Dview (CNES): add all space missions

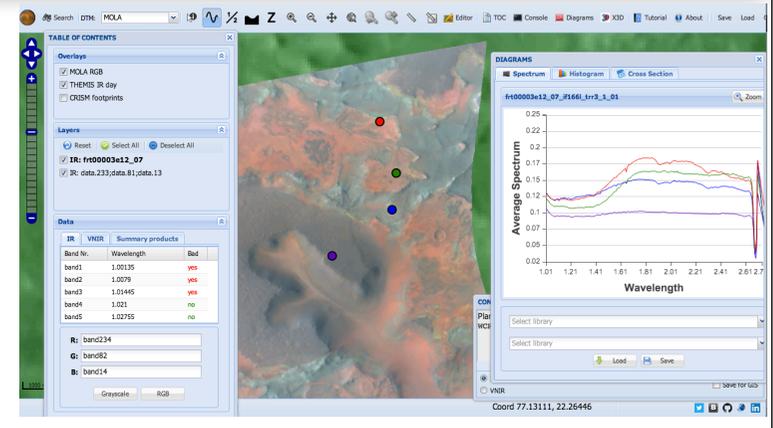

MATISSE (ASI): mapping on shape models

CASSIS (CNRS): add reflectance

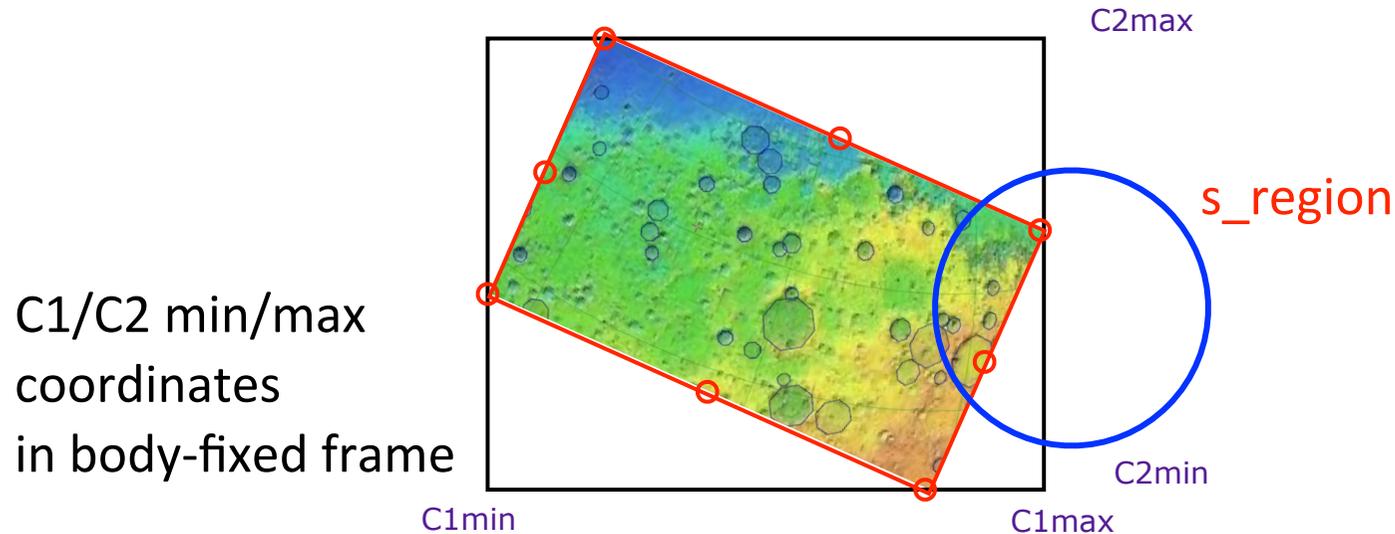

APERICubes: Browse PDS spectral cubes

PlanetServer (EU contract): VO-interfaced GIS

VESPA new standard: footprint formats

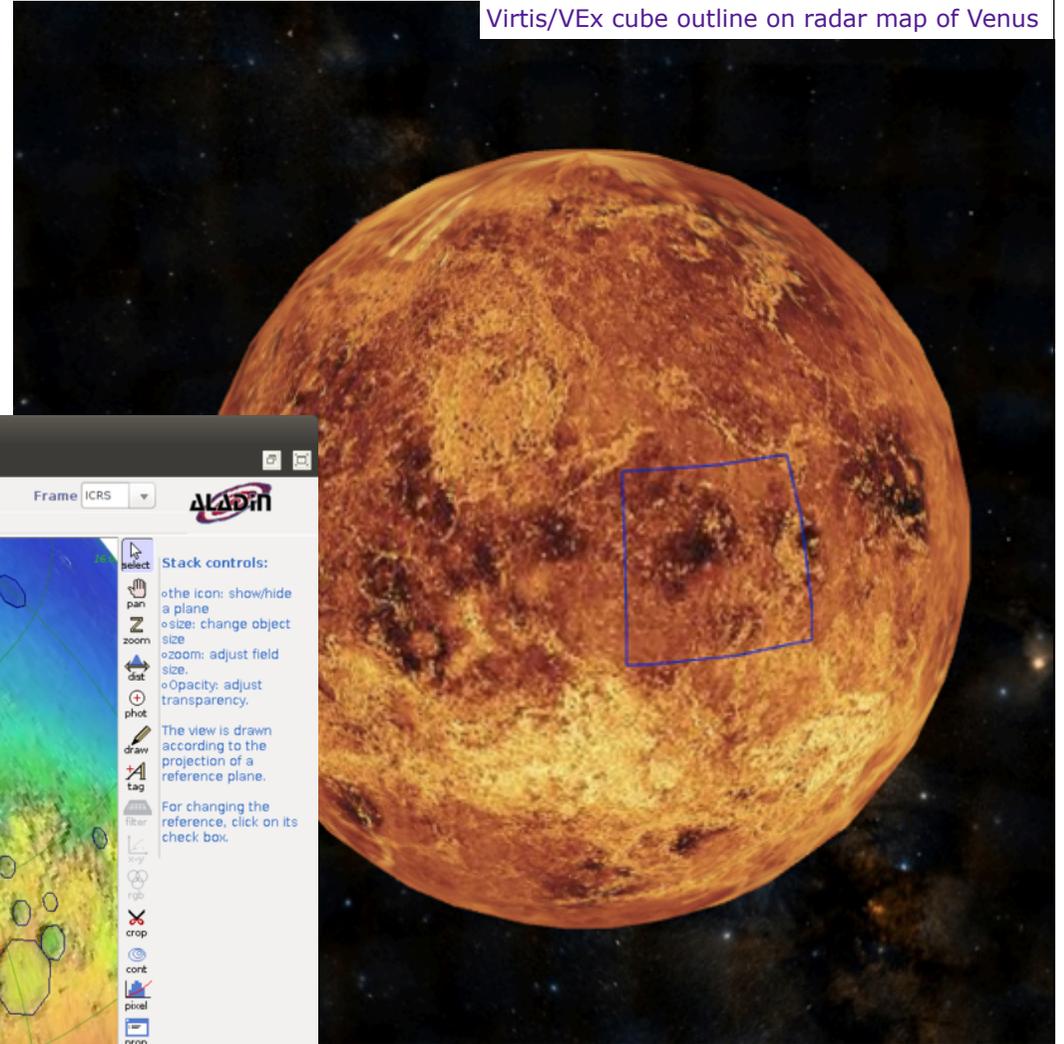

- PDS3-like limits
=> provide very rough estimate of footprint as a lon/lat bounding box
- IVOA's s_region parameter (sampling the contour)
=> provides much more accurate footprints with tunable resolution
+ support for footprint shape, polar views, etc
+ allows for very powerful searches on intersections, etc

VESPA news: one-click footprints visu on planets

Mizar: overplots
PDS footprints on 3D maps
on CNES tool

Virtis/VEx cube outline on radar map of Venus

Aladin: adapt IVOA footprints to planetary bodies, with some OGC-like processing

Data services connected via EPN-TAP

Currently (12 March 2017):

- 32 data services connected**
- ~ 10 being designed**
- All (12) pre-existing services updated to v2 in 2016**
- 20 new services added since last ASOV meeting (2016)**

- 4 teams/projects invited to implementation workshop in Graz, end of March**
- On going projects with ESA/PSA and NASA/PDS**

Data services connected via EPN-TAP / field

Open
Open in test
In development
Being studied

* New in 2016-17

Atmospheres

- Titan profiles - CIRS (Cassini, LESIA)
- Venus spectroscopy - VIRTIS (VEx, LESIA)
- * - Mars Climate Database (modeling, LMD-LESIA)
- * - Venus profiles - SPICAV/SOIR (VEx, IASB-BIRA)
- * - Mars profiles - SPICAM (MEx, LATMOS)
 - All MEx derived atmospheric products (via MEx IDS)
 - EuroVenus derived products (via C. Wilson)

Small bodies

- M4ast (ground based spectroscopy, IMCCE)
- 1P/Halley spectroscopy - (IKS / Vega-1, LESIA)
- BaseCom - (Nançay obs, LESIA)
- * - TNOs are cool - (Herchel & Spitzer + compilation, LESIA & LAM & Utinam)
 - Cometary lines catalogue (IAPS)
 - Vesta & Ceres spectroscopy - VIR/DAWN (IAPS)
 - Small bodies orbital catalogues:
- * DynAstVO: NEO refined parameters (IMCCE)
- * MPCorb (MPC / Heidelberg)
 - Rosetta ground-based support (via C. Snodgrass)
 - Support for 3D shape models (IMCCE)
- * - 67P illumination config (IRAP)

Surfaces

- * - Mars GIS (CRISM, Marsis... Jacobs, GEOPS)
- * - Mars craters (Jacobs, GEOPS)
- * - USGS planetary maps (Jacobs)
 - OMEGA data (MEx, IAS, via SIttools2)
 - MarsSI GIS (Lyon)

Solid spectroscopy

- SSHADE: ices & minerals (IPAG & network)
- Minerals emission db (DLR)
- PDS/MRO support db (LESIA)

Magnetospheres / radio

- APIS - HST (LESIA)
- * - RoutineJupiter (Nançay, LESIA)
- AMDA (CDPP / IRAP)
- * - MAG data (VEx, IWF Graz)
 - MASER & Juno support (LESIA)
- * - RadioJove (LESIA & US amateur network)
- * - Iltate HF data of Jupiter (Tohoku Univ)
 - Juno Ground support (Kharkiv, Ukr.)
 - Coupled Giant Planet Systems (modeling, UCL)
 - Generic wave polar. & propag. (modeling, IAP Prague)
- * - Interface with IMPEX models (IWF Graz)
 - Hisaki (Tohoku Univ.)

Exoplanets

- Encyclopedia of exoplanets (compilation, LUTH/LESIA)
- Transit observations (Bern)
- Interface with DACE (Geneva)

Solar

- HELIO AR & 1T3 solar features catalogues (LESIA)
- Bass2000 (LESIA)
- Radio Solar db (Nançay, LESIA)
- * - CLIMSO (Pic du Midi, IRAP)
- * - Iltate PPARC_R (Tohoku Univ)

Generic / interdisciplinary

- BDIP (LESIA)
- Planets, then satellites characteristics (LESIA/IMCCE)
- * - PVOL (EHU Bilbao & network)
- * - Gas absorption cross-sections (Granada)
 - Nasa dust catalogue (IAPS)
 - Stellar spectra, support for observations & exopl. (LESIA)
 - Telescopic planetary spectra collection (LESIA)
 - Interface with VAMDC (TBD)
- * - PSA complete archive (ESA)
 - DARTS (JAXA - currently via PDAP)
 - On-going discussions with PDS & IPDA

National level

"VESPA portal" proposed for labelling in ANO5

- **Search interface + tool connections**
- **Definition / maintenance of standards (IVOA + IPDA, SPASE...)**
- **A set of data services at Observatory of Paris**
 - Currently 15 open & >5 in dev (+ access to 4 ANO5-labelled services)
 - Also used as a repository for older ANO2 (e.g., space instruments)
restrained to data distribution services
- **Access to external services** (the portal also connects other services in France and elsewhere)
- Plus **training activities**, e.g. participation to doctoral training week in 2017 at PADC

VESPA documentation / codes / training material
